The RHINOCEPTION is the photo exhibition by a new talented photographer, Robert Jefferson, he will tell the world about the critical condition of Javan rhinos. The forest ranger in the photo picks up a rhino horn in the park. This is the result of illegal

poaching of rhinos. Rhinos will be killed as agricultural pests and for their horn, a high value Asian medicine. There are only 60 Javan rhinos left in the world, all of them are in Ujung Kulon National Park, Java, Indonesia. We need to conserve the remaining

population of Javan rhinos, otherwise the biodiversity will be greatly affected and the ecosystem will be disrupted. For more details, please visit Robert Jefferson's Photo Exhibition The RHINOCEPTION.
